Boil Water Advisory Rescinded for Wilson Co. Rural Water District No. 6

TOPEKA, Kan. – The Kansas Department of Health and Environment (KDHE) has rescinded a boil water advisory for the Wilson Co. Rural Water District No. 6 public water supply located in Wilson Co. The advisory was issued because of a loss of pressure in the system. Failure to maintain adequate pressure may result in a loss of chlorine residuals and bacterial contamination.

Public water suppliers in Kansas take all measures necessary to notify customers quickly after a system failure or shutdown. Regardless of whether it's the supplier or KDHE that announces a boil water advisory, KDHE will issue the rescind order following testing at a certified laboratory.

Laboratory testing samples collected from Wilson Co. Rural Water District No. 6 public water supply indicate no evidence of contamination and all other conditions that placed the system at risk of contamination are deemed by KDHE officials to be resolved.

###

KDHE's mission is to protect and improve the health and environment of all Kansans.
